Title: Effectiveness of two physical therapy interventions, relative to dental treatment in individuals with bruxism: study protocol of a randomized clinical trial - MS: 3948941681097165

Responses to editor comments:

"I think this is fine for publication with one additional comment (which the authors can make without additional review - unless you want to look at it administratively): in a couple of places, the manuscript states that assessments will be made "after physical therapy." However, one group will not be receiving physical therapy. Therefore it would be clearer to state the timeline rather than after a certain treatment."
