Dear Editor,

We appreciate your remarks about our manuscript. Your suggestions helped us to improve the scientific quality of our paper one more time. We would like to highlight that all suggestions were addressed in current version of manuscript.

Below we present a point-to-point answer for each comment. The changes in manuscript text are highlighted in yellow.

We hope that the current revised version of our manuscript is now suitable to be published in this respectable journal.

We look forward hearing from you soon.

Sincerely,

The authors.

**Editor’s comments:**

1) “This is much better. The authors just need to sort out the tenses then it can be published. For example in parts they use the form ‘will be used’ in others the form ‘was used.’ They need to be consistent.”
   **Answer:** We performed the revision regarding tenses used in manuscript as requested by editor.

2) If you could address his concerns and submit a revised manuscript within the next week, it would be very much appreciated. Whilst making the changes mentioned above, please also alter the title so it conforms to journal style for study protocols. The title should follow the format “__________: study protocol for a randomized controlled trial”.
   **Answer:** We performed this change as requested by reviewer.
